Pump Out Manifests for Grease Pretreatment Devices

Establishment

Address

City + Zip

ACTION REQUIRED: Register Grease Pretreatment Device(s) Online

The City of Bellevue has migrated the Grease Interceptor/Oil Water Separator Program compliance records to an online platform—SwiftComply. This will replace previously required mail and fax submission of device servicing records. Enrollment of your business via the website link below is required prior to **MARCH 5th, 2021** to stay in compliance with the City of Bellevue.

How do I enroll? No username or password required, simply go to <http://fogregister.com/bellevue> or scan the QR code above and register. Just follow the unique link you will receive in an email invitation to access your business's profile every time.

What info do I need? Your grease interceptor/oil water separator size and location, updated contact information, upload your most recent pump out report, and link your pump out service provider (if applicable).

Why should I do this? Bellevue Sewer Code 24.04.213 requires pretreatment of discharges to the sewer system to prevent raw sewer backups, avoid system failures, and to protect private & public sewer systems from degradation. Submitting annual reports online will ensure your site is in compliance with this code. Our online portal is easy to use and allows you to access your compliance records at any time.

Where can I find a service provider? Visit app.swiftquote.us to request quotes from local providers, compare pricing, book services and have the records uploaded directly to the online tracking system. SwiftQuote is a voluntary and free online directory service aimed at supporting local businesses.

Questions?

SwiftComply Online Account Help Contact - hello@swiftcomply.com or 619.304.6022

Your City of Bellevue Contact - tbarrios@bellevuewa.gov or 425.452.7946

Thank you for adhering to our program updates,
